

Clinical Prescribing Guide

Environmental Detoxification

Foundation Product for Environmental Detoxification

DetoxClear is a berry-flavoured powder, formulated to help support natural liver and body detoxification processes. It supports healthy liver function, body tissue repair and GI mucosal membrane health, as well as providing antioxidant support.

The formulation includes glutamine, organic chlorella and spirulina, glycine and quercetin.

DetoxClear also features broccoli seed extract, green tea, milk thistle, pomegranate, vitamin A, levomefolic acid, mecobalamin and pyridoxal-5-phosphate.

Targeted Environmental Toxins

HM-Clear is a targeted formulation to support natural detoxification processes in the body. The formulation provides a rich source of antioxidants and helps to maintain levels of key nutrients in the body.

HM-Clear includes glutathione, selenium, alpha lipoic acid and vitamin C as antioxidants, as well as garlic and levomefolic acid.

HM-Clear is formulated to maintain levels of key nutrients such as folate, selenium, vitamin C, zinc and manganese. Exposure to toxins such as heavy metals may increase some nutrient requirements.¹⁻⁷

Targeted Environmental Toxins

DioxiClear is a targeted formulation. It supports natural liver detoxification processes with milk thistle, used in traditional Western herbal medicine to promote healthy liver function. The formulation maintains nutrient levels in the body and provides antioxidant support.

DioxiClear includes milk thistle, which is used in traditional Western herbal medicine to support natural liver detoxification processes and promote healthy liver function.

The formulation also features chitosan, guar gum, quercetin, vitamin C and vitamin E.

Supportive Restores Beneficial Gut Flora

BiomeClear is a Scobiotic® blend, formulated to aid natural body and gastrointestinal (GI) detoxification processes. It also restores beneficial intestinal flora, supports healthy GI function and promotes GI mucosal health.

BiomeClear combines specific probiotic bacteria with a probiotic yeast, prebiotics, medicinal mushrooms, spirulina, chlorella, *Dunaliella salina*, artichoke, milk thistle and lutein.

Gut health and microbiome balance are affected by many environmental toxins.⁸⁻¹²

Supportive Fibre Supports Elimination

RelieFibre™ (Organic Sunfiber®) is a natural galactomannan-based soluble prebiotic dietary fibre, made from organic partially hydrolysed guar gum (PHGG).

PHGG is a source of fibre which contributes to regular bowel movement.

Increased fibre intake can aid excretion of toxins by supporting movement of waste and toxins via the bowel.^{13,14}

Detoxification Protocols

bioclinic[®]
naturals

STAGE 1 - PREPARATION

Consider DetoxClear to prepare for a targeted environmental detoxification protocol. DetoxClear can be used on its own for general liver and body detoxification.

Use for 2 weeks before a targeted intervention to support preparation.

STAGE 2 - COMMENCE TARGETED PROTOCOL A, B OR C

TARGETED TOXINS

Consider this combination for high exposure to toxins such as heavy metals.

Use combination for a minimum of 2 weeks.

Duration will be patient-specific, based on toxin levels or risk.

TARGETED TOXINS

Consider this combination for high exposure to toxins such as pesticides, other persistent organic pollutants (POPs), solvents, BPA and phthalates.

Use combination for a minimum of 2 weeks.

Duration will be patient-specific, based on toxin levels or risk.

GUT HEALTH SUPPORT

Consider this combination for high exposure to toxins that affect gut health and microbiome balance.

Use combination for a minimum of 4 weeks.

Duration will be patient-specific, based on toxin levels or risk.

OPTIONAL SUPPORT

Consider prescribing these products alongside selected detox protocol.
